DOSING EQUIPMENT

Shark floating dispenser

Allows easy dosage of pool chemicals. Made of high impact polystyrene. It has a capacity for 5 tablets of 200 grs.

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
36620	1	-	-

Floating dispenser

Original floating dispenser ideal for residential and above ground pools. Adjustable chlorine supply. It also allows easy control of chemical product remaining in the dispenser, thanks to an original floating signal system. For a quantity of 1 kg in tablets.

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
33813	1	-	-

MINI floating-dispenser for 20 g tablets

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
11733	1	-	-

Dossi-5 in-line and Dossi-10 in-line Bromine feeders

Bromine dispenser. Manufactured from unalterable plastic materials (ABS). With regulation valve, manual purge, Venturi automatic depression purge, and opening key. For pools up to 45 m³ with the Dossi-5 dispenser and up to 90 m³ Dossi-10 dispenser. Connections 1 1/2". Ø 200 mm.

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
21438	1	3.7	0.031
21439	1	4.8	0.049

Dossi-5 in-line. Height 486 mm.
Approximate capacity: 5 kg of tablets
Dossi-10 in-line. Height 725 mm.
Approximate capacity: 10 kg of tablets

DOSING EQUIPMENT

Chlorine and Bromine Feeder 5 kg Dossi-5 off-line

Bromine and Chlorine feeder. Manufactured from unalterable plastic materials (ABS). Approximate capacity: 5 kg of tablets for Dossi-5 and 10 kg for Dossi-10. Supplied with two valves in order to stop the water flow. Height 486 mm and Ø 200 mm. Connections Ø 20 mm.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Dossi-5 off-line For pools up to 100 m ³	01413	1	3.7	0.031
Dossi-10 off-line For pools up to 200 m ³	43998	1	4.86	0.048

new

Chlorine and Bromine Feeder 3.5 kg Dossi-3

Chlorine and Bromine feeder. Manufactured from unalterable plastic materials (ABS). Approximate capacity: 3.5 kg of tablets. Lid closing with double safety system. Easy to operate regulation valves. For pools up to 60 m³ with Chlorine and up to 30 m³ with Bromine. Height: 405 mm.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Dossi-3, in-line For direct connection to pipework With 1½" connectors	24429	1	1.81	0.03
Dossi-3 off-line For by-pass connection with flexible tube	24430	1	1.90	0.031

Code 24429 IN-LINE

Code 24430 OFF-LINE

DOSING EQUIPMENT

INSTALLATION DIAGRAM OF CHLORINE/BROMINE DOSING UNITS AND AUTOMATIC REGULATING AND CONTROL EQUIPMENT

Compact dosage tank

Trichlor and Bromine tablet dosage unit with automatic safety valve. Made out of fibreglass and polyester.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Compact dosage tank 40 l Trichlor (for pools from 200 to 500 m ³) Bromine (for pools from 150 to 300 m ³)	16631	1	14.0	0.128
Compact dosage tank 60 l Trichlor (for pools from 500 to 1000 m ³) Bromine (for pools from 300 to 450 m ³)	16632	1	18.0	0.185

Safety valve kit

PVC safety valve, with a spring and metallic pull ring. Opening pressure 2.5 - 3 bar (Kg/cm²).

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
For 40 l dosage tank	16633	1	0.4	0.002
For 60 l dosage tank	16634	1	0.4	0.002

Flowmeter kit

Plastic made flow meter for 100 to 1,000 l/h flow for 40 l dosing tank, and a 250 to 2,500 l/h flow for 60 l dosing tank both installed on a PE panel. Strainer, non-return valve and PVC ball valve included. Used to help regulation for 40 l and 60 l feeders.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
For 40 l tank from 100 to 1000 l/h	16635	1	3.0	0.046
For 60 l tank from 250 to 2500 l/h	16636	1	3.3	0.050

ASTRALPOOL SIGNATURE SALT ELECTROLYSIS & PH CONTROL

AstralPool has incorporated a new line of equipment into its current salt chlorinators range for residential pools under the name AstralPool Chlore, which has more advanced technological features.

GENERAL FEATURES

	SMART			SMART +			ELITE AstralPool Signature		
Model	30	60	100	60	100	160	60	100	160

Electrodes	3	5	7	5	7	7	5	7	7

Estimation criteria based on a filtration time of 6 to 10 hours.

- Twin cell system prevents the formation of incrustations on the chlorinator cell and improves energy af.
- High quality electrodes.
- Salinity alarm with LED indicators.

AstralPool Chlore Elite

This product is part of the AP Signature range.

A bubble detector, flow switch and compact probe holder as standard.

High quality electrodes with a 15,000 hour useful life under laboratory conditions and from 4,000 to 7,000 hours under normal conditions.

The Salt levels are controlled through a powerful system of salinity alarms that have different indicators for high and low salt levels.

An automatic system that prevents the formation of deposits in the electrolysis cell - user programmable from the control panel.

Production control 0 - 100% (11 current levels).

Complete and automatic control over water treatment, when pH and chlorine control are added to the benefits of the salt chlorinator.

Dosing pumps not included.

SALT ELECTROLYSIS & pH CONTROL

new

AstralPool Chlore Smart

Basic equipment in the range with the possibility of adapting two external controls: Redox/cover detector control.

Mass-produced equipment with a bubble detector.

Electrodes have a lifetime of 10,000 hours under laboratory conditions, whilst under normal conditions their expected lifetime is 3,000-5,000 hours.

Salinity alarm: thanks to a shared LED it shows when there is too much or not enough salt in the water.

Polarity inversion regulation current. It has an automatic system that prevents the formation of scale on the electrolysis cells – programmable 2/3 hours.

Production control. Five production control levels from 0 to 100%.

Recommended: control Ph levels using 36002-36004 machines.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
AstralPool Chlore Smart 30	42347	1	3	0.046
AstralPool Chlore Smart 60	42348	1	5	0.046
AstralPool Chlore Smart 100	42349	1	7	0.046

new

AstralPool Chlore Smart +

Middle-of-the-range equipment. External controls can be adapted: redox, cover and flow switch included.

Mass-produced equipment with a bubble detector, flow detector and a 50-1/2 connection collar.

Equipped with high quality electrodes with a lifetime of 15,000 hours under laboratory conditions, and 4,000-7,000 hours under normal conditions.

Salinity alarm: has different LED indicators for HIGH and LOW salinity. It shows the salt levels needed.

Polarity inversion regulation current. It has an automatic system that prevents the formation of scale on the electrolysis cells – can be programmed by users from the control panel.

Production control. Eleven production control levels. From 0 to 100%.

Recommended: control Ph levels using 36002-36004 machines.

Sel Watch colorimetric system

Colorimetric device without probe or calibration. High liability controls and regulates production of chlorine through a salt chlorinator or a dosing pump (products not included). Input 220V 50/60Hz. Water temperature of 15° to 32°. Standard lecture every 2 hours, if it is required variable to 30 minutes for frequents pools (public and semi-public pools).

Include:

- 2 dosing pumps, one for the lecture's inlet and the other one for the reactive's dosing.
- 1litre of reagent Amichloryte , mades with vegetal and mineral substances, and certified by an independent laboratory as a non pollutant and not a dangerous substance.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Sel Watch	45749	1	4,8	0.071
1 liter reagent Amichloryte	45750	1	-	-

SALT ELECTROLYSIS & pH CONTROL

VX Salt Chlorinator

New VX reverse polarity self cleaning salt chlorinators. 63 mm water conn. on cell housing, sophisticated electronic control over reversing times extends cell life. Large LCD user interface, Spa mode output, low salt 4000 ppm. Optional: Timeclock or non clock models.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Chlorine Output				
Up to 96 m³				
25 g/h

Astral Sel Basic

Reverse polarity self cleaning chlorinator. Easy installation and use. Meant for pools up to 75 m³. Provides a good quality/price ratio. Optional flow switch. (available on request). Assembly on panel NOT included.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Chlorine production				
Up to 25 m ³				
6.2 g/h	41654	1	6	0.055
Up to 50 m ³	41655	1	6	0.055
Up to 75 m ³	41656	1	6	0.055

Astral Sel

Reverse polarity self cleaning chlorinator. Salt concentration: 5 g/l. Includes: Flow switch, Pool Terre and salt analysis strips. Assembly on panel NOT included.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Chlorine production				
Up to 40 m ³				
11.3 g/h	34624	1	12.4	0.001
Up to 60 m ³	34625	1	12.4	0.001
Up to 100 m ³	34626	1	12.6	0.001
Up to 160 m ³	34627	1	12.6	0.001

Astral pH

pH automatic control system. Includes: proportional dosing pump; 1 electrode; 1 reagent kit; 1 installation Kit. Automatic calibration. Assembly on panel NOT included.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Up to 200 m ³	34628	1	4.2	0.001

SALT ELECTROLYSIS & pH CONTROL

Combi Astral Sel - pH

Salt electrolysis and pH regulation. Flowmeter included. Astral Sel and Astral pH provided, not installed onto panel.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Up to 40 m ³	34629	1	15.0	0.122
Up to 60 m ³	34630	1	15.0	0.122
Up to 100 m ³	34631	1	15.2	0.122
Up to 160 m ³	34632	1	15.2	0.122
Salinity analysis Kit	07937	1	0.8	0.001

Control Basic

Small in size, it was designed to prevent siphoning. The product requires little maintenance and is easy to install and protected from the spraying of chemical products. The device automatically measures and checks pH/Redox. Use with Astral Sel and Astral Sel Basic is recommended. **Supplied without sensors or calibration solutions. Installation kit included.**

- Plastic container with IP-55 protection
- Backlit LCD display
- Self-calibration of electrodes
- Quality control of electrodes
- Dosing pause during alarms and notification by a blinking LED
- Proportional dosing
- Adjustable set point

Flow rate: 1.5 l/h or 5 l/h

Back pressure: 1.5 bar

pH measurement interval: 0.00...14,00pH

Redox measurement interval: -999...+999 mV

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Control Basic 1.5 l/h	36002	1	2.2	0.01

SALT ELECTROLYSIS FOR PUBLIC POOLS

Salt Electrolysis for public pools

Salt water chlorinators for commercial pools are becoming popular because they are efficient, practical, safe and well priced. Our wide range of industrial electrolysis systems covers self-cleaning equipment of up to 500 grams/hour of Chlorine, which makes it possible to use saline electrolysis to treat the water at any public use facility.

Our **Basic** range incorporates EX electrodes which provide the highest durability in self-cleaning systems. The **Plus** range incorporates a control and automatic dosing equipment for ORP (Redox) and PH which allows for better management of the equipment and provides an excellent water quality at all times. The **Plus Plus** range incorporates a Chlorine and pH value control and regulation system

Main advantages:

Safety: There is no need to store, handle or dose any chemical products and therefore it is a much safer system. The raw material stored is common salt.

Savings: The introduction of saline electrolysis systems can bring net savings in operating costs of around 50-60%, with respect to traditional systems
Peristaltic pump not included.

For hose Ø 50 mm	25894	1	0.6	0.001
For hose Ø 63 mm	25895	1	0.6	0.001

Other sizes upon special order.

UV AUTOMATIC DISINFECTION

A fully automatic ultraviolet light (UV-C) system that provides double water disinfection via a significant reduction in chloramines (combined Chlorine) and the elimination of bacteria, viruses and other micro-organisms that are present in pool water by preventing their production.

The end result is excellent water quality, without unpleasant odours or eye irritation, less chemical expense, and savings on water recycling. A residual level of disinfection is still necessary, although the cost of chemical products is significantly lower.

Easy installation via by-pass in the pool return line and minimal maintenance: only the lamp may need replacement.

Clair-UV "MP" ultraviolet system for commercial pool

Medium pressure.

Efficient reduction in chloramines present in water and elimination of micro-organisms even those that are normally resistant even to Chlorine. Complete with cable and connectors. **Body in S.S. AISI-316L - Medium pressure lamp. Dosage 60 mJ. Electrical control box: IP-54 protection.**

TRIOX-R Residential Ozone Generator

Ozone is the most powerful oxidising agent known, and is currently used in disinfecting processes for pool water. It can be used on its own or in combination with other disinfectants such as Chlorine and Bromine. TRIOX-R ozone generating systems are designed to be used in spas and residential pools with a capacity up to 200 m³. These are extremely compact units allowing easy access to their components thus making installation, maintenance and repair much easier. **All TRIOX-R must have the 33511 code no. added to them when ordering.**

AUTOMATIC OZONE DISINFECTION SYSTEM FOR COMMERCIAL POOLS

TRIOX-P industrial Ozone Generator

Designed to simplify traditional ozone generators weak points, each unit consists of a reactor and a transformer. Directly connected without any high voltage cable. Includes safety control systems. High energy efficiency thanks to its proportional/discontinuous regulation system. The whole system is controlled by an electronic system that is perfectly compatible with any industrial control network (Profibus, ModBus, Ethernet etc.). Remote maintenance and breakdown supervision may be carried out via a telephone line.

AUTOMATIC OZONE DISINFECTION SYSTEM FOR COMMERCIAL POOLS

Mixing ozone with water: Contact chambers

Contact chambers manufactured in fibreglass and polyester resin with internal parts made of 100% non-corrosive PVC. With an internal gel coat that can support maximum ozone concentrations of 0.5 ppm. Working pressure of 2.5 Kg/cm² and test pressure of 3.75 kg/m² equipped with lateral manhole, lateral sight-glass, 3/4" water purge and air relief to be connected to an automatic purge for ozone. Thanks to its internal design, optimum mixing of ozone and air / water is assured.

CONTINUOUS FLOCCULATION SYSTEM

Autofloc continuous flocculation system

Autofloc is an automatic continuous flocculant dosing unit for pool water. Includes 1 litre per hour dosing pump and injector nozzle.

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
19936	1	5.6	0.033

DOSING PUMPS

Exactus membrane dosing pumps

Electronic dosing pump for wall mounting or horizontal base. 6 models available:

- Analogical manual
- Microprocessor manual
- Proportional processor via mA external signal
- With incorporated pH instrument
- With incorporated Redox instrument.
- Volumetric (enquire Aquastral)

All systems comply with EC regulations. IP-65 protection. Electrical connection: 220/240 V 50/60 Hz. Materials in contact with the liquid: Polypropylene, Viton, Teflon and PVC. Other valve models in different materials available on request. Includes anti-acid plastic housing. Touch sensitive moisture resistant indicator. Drainage valve included. Lubrication-free, minimal maintenance. On request, the unit can be supplied with outlet, level probe or other operating voltages.

EXACTUS PUMP PERFORMANCE CURVES

Exactus Manual model

Electronic dosing pump for wall mounting or horizontal base. Manually regulated flow rate. Regulation range: 0-100% and 0-20%. Acid resistant plastic housing.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Manual 2 l/h - 5 bar	43474	1	4	0.20
Manual 2 l/h - 10 bar	43475	1	4	0.20
Manual 5 l/h - 7 bar	43476	1	4	0.20
Manual 5 l/h - 10 bar	43477	1	4	0.20
Manual 10 l/h - 5 bar	43478	1	4	0.20
Manual 20 l/h - 5 bar	43479	1	4	0.20

DOSING PUMPS

Exactus Manual Microprocessor model

Electronic dosing pump for wall mounting or horizontal base. Manually regulated flow rate with digital control for injection frequency. Regulation range: 0-100% and 0-20%. Product ready to incorporate level probe (not included). Acid resistant plastic housing.

		Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Manual	2 l/h - 10 bar	43486	1	4	0.20
Manual	5 l/h - 7 bar	43487	1	4	0.20
Manual	5 l/h - 10 bar	43488	1	4	0.20
Manual	10 l/h - 5 bar	43489	1	4	0.20
Manual	20 l/h - 5 bar	43490	1	4	0.20

Exactus Proportional model

Electronic dosing pump for wall mounting or horizontal base. Microprocessed proportional regulation via mA external signal 4 – 20 mA.

		Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Proportional (4-20mA)	5 l/h- 7 bar	43491	1	4	0.20
Proportional (4-20mA)	5 l/h- 10 bar	43492	1	4	0.20
Proportional (4-20mA)	10 l/h- 5 bar	43493	1	4	0.20
Proportional (4-20mA)	20 l/h- 5 bar	43494	1	4	0.20

Exactus pH / Rx model

Electronic dosing pump for wall mounting or horizontal base. Redox and pH regulation via proportional control. Regulation range: 0% - 100%. pH electrode not included.

		Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Modelo pH / Rx	5 l/h - 7 bar	43495	1	4	0.005
Modelo pH Rx	5 l/h - 10 bar	43496	1	4	0.005
Modelo pH Rx	10 l/h - 5 bar	43497	1	4	0.005

Exactus CL model

		Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Modelo CL	5 l/h - 7 bar	43498	1	4	0.005
Modelo CL	5 l/h - 10 bar	43499	1	4	0.005
Modelo CL	10 l/h - 5 bar	43500	1	4	0.005

Exactus Volumetric VFT model

		Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Modelo Volumétrica	5 l/h- 7 bar	43501	1	4	0.005
Modelo Volumétrica	5 l/h- 10 bar	43502	1	4	0.005
Modelo Volumétrica	5 l/h- 10 bar	43503	1	4	0.005
Modelo Volumétrica	20 l/h- 5 bar	43504	1	4	0.005

Optima dosing pumps

The OPTIMA dosing pump represents the development of more than 30 years of experience in the automatic dosing field. This new series reduces the number of pumps required to meet the various dosing needs.

The OPTIMA dosing pump series, with its new power supply technology from 90, VCA to 265 VCA and at 50-60 Hz, ensures a precision and reliability never seen before.

Integration of many functions due to its simple programming, an alphanumeric display, the possibility of multilingual programming of the menu and a new technology which permit controlled flow rate and back pressure. Allows to use the same model for various applications providing a great versatility.

Systems produced according to EC standards, IP65 protection, 90-265 VCA 50/60 Hz electrical power supply. Materials in contact with the chemical product are made of polypropylene, Viton, Teflon and PCV (other materials possible upon request). Anti-acid plastic container. Moisture-resistant membrane buttons. Built-in relief valve. No lubrication necessary, minimum maintenance. Peristaltic pump also available (see page 232).

AUTOMATIC OZONE DISINFECTION SYSTEM FOR COMMERCIAL POOLS

OPTIMA constant flow rate analog dosing pump

The flow rate can be set as a percentage using the potentiometer under the front panel, which modifies the pump's operation frequency. Disposes of a level sensor inlet.

Double scale adjustment: OPTIMA analog dosing pumps can divide the maximum dosing frequency by 5. This double scale allows the user to have two pumps with a single model.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Type B Optima Manual Adjustable Pump 5-10 bar and 2-5 l/h	36007	1	3.5	0.01
Type C Optima Manual Adjustable Pump 5 bar and 10 l/h	36008	1	4.5	0.01
Type D Optima Manual Adjustable Pump 5 bar and 20 l/h	36009	1	4.5	0.01

OPTIMA proportional and volumetric digital dosing pump

OPTIMA pumps provide all the functions of proportional dosing in a single model.

Features:

- Proportional with analog signals 0/4...20mA
- Proportional with digital signals and the possibility of:
 - Multiplying the input impulses (1:n)
 - Dividing the input impulses (n:1)
 - Function in ppm
 - The pump has a memory function for processing input impulses dosing
- Level alarm with pump disconnection.
- Maximum dosing flow rate to prevent overdosing.
- Password for protecting programmed data
- Possibility of alarm connection.
- 90-265 VAC 50/60 Hz power supply.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Type B Model 7-10 bar and 5 liters	36010	1	3.5	0.01
Type C Model 5 bar and 10 liters	36011	1	4.5	0.01
Type D Model 5 bar and 20 liters	36012	1	4.5	0.01

OPTIMA dosing pump with pH / Redox analyzer

OPTIMA dosing pump with built-in pH/Redox control. pH/Redox instrument. Automatic calibration: Calibration by simply pressing a button, with the possibility of controlling the level of probe efficiency

Features:

- 90-265 VAC 50/60 Hz power supply
- Manual compensation of temperature for pH or automatic compensation with PT100.
- 4...20mA output for printed register or transmission of the reading.
- Level alarm with pump disconnection.
- Set point deviation alarm, programmable for the entire measurement range.
- O.F.A. time (Over Feed Alarm) to prevent dosing if any probe malfunctions.
- Maximum dosing flow rate to prevent overdosing.
- Password for protecting programmed data.
- Possibility of alarm connection.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Type C Optima Redox/pH control dosing pump (10 bar and 5 l/h and 5 bar and 10 l/h)	36013	1	4.5	0.01

Sensors				
pH sensor with calibration solutions (Code: 36004)	●		●

DOSING PUMPS

Automatic relief valve

Gas inside the dosing pump head may compromise proper operation of the pump. The relief valve automatically eliminates gas produced inside the pump's head. The relief valve must be installed directly on the dosing unit's delivery valve.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Automatic relief valve	36829	1	0.1	0.001

Bracket for mounting above tank

Optional support for mounting the OPTIMA series and pH Basic horizontally; for example, above chemical solution tanks.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Support bracket above tanks	36830	1	0.1	0.002

Peristaltic dosing pump

Maximum flow 3 l/h at 96 r.p.m. Power supply 220/240 V 50/60 Hz. Regulation from 10% to 100%. The materials in contact with the liquid are Silicone and PP.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
With housing	07822	1	6.5	0.076

Polyethylene cylindrical tanks

To hold chemicals for dosage pumps.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Capacity: 100 l	34316	1	4.5	0.120
Capacity: 250 l	01315	1	10.0	0.390
Capacity: 350 l	01316	1	14.0	0.510
Capacity: 500 l	01317	1	21.5	0.760
Capacity: 1000 l	28831	1	-	-

Manual stirrer

AUTOMATIC REGULATION AND CONTROL EQUIPMENT

Definition:

- Organic Chlorine (stabilised Chlorine):** This term is used to indicate pools treated with trichlor tablets, granular Dichlor etc. – in other words, pools that use an Isocyanuric acid organic compound.
- Inorganic Chlorine (un-stabilised Chlorine):** This term is used to indicate pools treated with either Sodium or Calcium Hypochlorite.
- Organic Bromine:** This term is used to indicate pools treated with Dimethylhydantoin Bromine (in tablets).

Easywatch control and regulation system for residential pools

Chemical product dosage control and regulation system for residential pools. It is easy to operate with minimal maintenance, user-friendly design. It consists of a central unit which controls dosage, pH and Redox potential electrodes which measure water quality, mounted on an analysis chamber.

Includes electrodes. The unit features 5 operational modes with different symbols for each mode:

- OFF: Switched off.
- ECO: This is the appropriate level for water which does not need a high degree of disinfection as the water is already of high quality and therefore does not require much disinfection. For example, would be the case in pools with few swimmers or relatively low temperatures or water volumes small.
- NORMAL 1: This is to be used when disinfectant needs are within normal limits due to the number of pool users, water temperature or volume, or the type of chemical being regulated.
- NORMAL 2: To be used when a greater level of disinfection is required, for whatever reason, including increased number of swimmers, a higher than normal concentration of contaminants is expected or for other reasons.
- SUPER: This level is to be employed when the demand for disinfectants is extremely high, for example after a storm or should the water require a small hyper-chlorination treatment.

Each operational mode automatically adjusts the dosage of pH corrector and disinfectant.

Rolachem RC8 Series - Automatic Acid (pH) & Chlorine (ORP)

The RolaChem RC8 is a proportional dosing pH and ORP controller. New pH and ORP sensors have integral amplifiers and high level shielding to virtually eliminate interference. Easy to calibrate and easy to operate with large 4 line LCD display to guide installers and users through set up and operation. Integral peristaltic pumps from 1 RPM to 100 RPM for all size swimming pools and ABS case. Software easily adjusts dosing rates for bather load and weather conditions. Available in ORP only, pH only and ORP and pH control. 3 Year Pro rata warranty.

	Code	Chlorine Pump	Acid Pump	Standard Packaging
Chlorine (ORP) & Acid (pH) models:

AUTOMATIC REGULATION AND CONTROL EQUIPMENT

SmartWatch colorimetric control and regulation system for commercial pools

Smartwatch is a control and automatic dosing equipment for pH and residual level of free Chlorine in water. The advantage of this equipment consists in that it gets the free Chlorine reading through colorimetrics (DPD). This system is used in photometers and it is backed up with many years of experience high reliability. The new equipment SMARTWATCH also measures REDOX and water temperature. It can incorporate the measurement of Total Chlorine, DPD-3 conductivity, turbidity and flow. Using a special software it is possible to control the equipment from a PC remotely through internet, mobile phone or local control. The system allows access to the information in real time or to all the installation history.

Includes: Readings of Chlorine (DPD-1), pH (includes sensor), Redox (includes sensor), temperature (includes sensor) and software for local connection (not internet).

The internet communication equipment code 35073. Includes: Modem, antenna, Software license maximum 5 controllers.

Poolwatch Basic control and regulation system for commercial pools

A range of units based on the control and regulation of chemicals, designed for use in public pools.

2 parameter control range. Control and regulation is achieved by taking two readings of either pH and RedOx potential in mV, or pH and Chlorine concentration (ppm), or pH and hydrogen peroxide concentration. PH and RedOx measurements are potentiometric, whilst those measuring Chlorine and hydrogen peroxide concentrations are amperometric, in ppm. 2 analogical 4-20 mA outlets are included for registration or modulation, as well as an RS-485 outlet for communications.

AUTOMATIC REGULATION AND CONTROL EQUIPMENT

Installation diagram for organic Chlorine or Bromine

Installation diagram for Inorganic Chlorine

AUTOMATIC REGULATION AND CONTROL EQUIPMENT

Controller

Automatic pH, Redox and free Chlorine regulation equipment.

CONTROLLER MINOR/1 - (Organic or inorganic Cl)

- pH & Redox self-calibration.
- Manual or automatic temperature compensation (with optional sensor PT 100).
- Regulating flow valve.
- Emptying faucet for maintenance and taking of samples.
- Recommended for residential swimming pools.

Includes:

- pH/Redox electrodes.
- Buffer solutions kit.
- Sensor holder.
- Control panel.
- Flow detector with alarm signal.

Does not include dosing pump nor electric valve for tablets dosage.

CONTROLLER/3 pH-Redox - (Organic or Inorganic Cl)

- pH & Redox self-calibration.
- Manual or automatic temperature compensation (with optional PT 100 sensor).
- Galvanic separation.
- 4-20 mA outlet for external registration.

Includes :

- pH/Redox electrodes.
- Buffer solutions kit.
- Control panel.

Does not include dosing pump nor electric valve for tablets dosage.

CONTROLLER/3 pH-Cl free - (Organic or Inorganic Cl)

- pH & Chlorine self-calibration.
- Automatic temperature compensation
- Galvanic separation.
- 4-20 mA outlet for external registration.

Includes :

- pH/Chlorine/sensor electrodes.
- Buffer solutions kit.
- Control panel.

Does not include dosing pump nor electric valve for tablets dosage.

CONTROLLER/4 pH-Cl free/Redox - (Organic or Inorganic Cl)

- pH, Chlorine and Redox self-calibration.
- Automatic temperature compensation
- Galvanic separation.
- 4-20 mA outlet for exterior register.

Includes :

- pH/Chlorine/Redox electrodes.
- Buffer solutions kit.
- Control panel.

Does not include dosing pump nor electric valve for tablets dosage.

WATER METERS

Residential water meters

Dry operation. Models 1/2" - 3/4" single jet. Models 1" - 1 1/4" - 1 1/2" multiple jets. Adjustable totalizer 360°. For cold water up to 30°. Direct reading by means of numbered drums. From 1" prefitted with cycle emitter of impulses and EEC 75/33 certified. Fittings included.

ATTENTION:

The water meter metrology, indicated below, follows CEE/ISO class A regulations.

*Measuring mechanism not removable.

Woltman type turbine meters

Woltman type axial turbine water meter, with numerical counter readout, and numbered drums. Dry dial with magnetic transmission. Easily removable gearwork and turbine. Pre-set for pulse emission. IP-68 protection level. CYBLE type pulse emission.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
2" gauge - 50 mm	20430	1	12.0	0.004
2 1/2" gauge - 65 mm	20431	1	13.6	0.004
3" gauge - 80 mm	20432	1	14.6	0.004
4" gauge - 100 mm	20433	1	20.0	0.006
5" gauge - 125 mm	20434	1	30.0	-
6" gauge - 150 mm	20435	1	36.0	0.009
8" gauge - 200 mm	20436	1	55.0	0.012
CYBLE type emitter K= 1 l/pulse	23235	1	-	-
CYBLE type emitter K= 10 l/pulse	23235-0010	1	-	-
CYBLE type emitter K= 100 l/pulse	23235-0100	1	-	-

CONTROL SYSTEMS

Electrically driven plastic valves - Nylon

Threaded connection. Manually operated ON position Flow regulator. Stainless Steel AISI-302 spring. Maximum working pressure = 10 atm.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
1½" connections	09392	1	0.5	-
2" connections	06935	1	0.7	-
3" connections	06936	1	1.1	-

MODELS	09392	06935	06936
Connection	1½"	2"	3"
Minimum pressure kg/cm ²	1	1	1
Maximum pressure kg/cm ²	10	10	10
Maximum flow m ³ /h	30	40	60

Pressure and flow diagrams

24 Volt. solenoids

To install in electric valves with code 09392, 06935 and 06936.

CONTROL SYSTEMS

BALANCE TANK INSTALLING DIAGRAM

- ❶ Maximum water level signal in BALANCE TANK for starting the pumping system and electrodriven water inlet valve shut down.
- ❷ Minimum water level signal in BALANCE TANK for opening the electrically operated valve for make up water.
- ❸ Minimum level signal in BALANCE TANK for shutting down the pumping system.

Electronic operating panel for overflow pool balance tank

For overflow pool. Water level sensor with 2 m cable.

For 2 water levels control panel:

* Minimum safety level for pump operation: The pump stops working if water level doesn't have the minimum set level.

* Water make up level: Gives the solenoid valve the opening signal to keep correct water level in balance tank. Solenoid valve signal in 220 V II & 24 V II.

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
12061	1	-	-

3 water level control panel:

* Minimum safety level for pump operation: The pump stops working if water level reaches the minimum set level.

* Water make up level: Gives the solenoid water inlet valve, the opening signal to keep correct water level in balance tank. Solenoid valve signal in 220 V II & 24 V II.

* Pump start level: The pump starts operation when water level in balance tank reaches the overflow level (pipe burst or check valve failure).

Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
12062	1	-	-

Buoys

Plastic float.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
26 x 34 - 1"	20259	1	-	-
40 x 49 - 1 1/2"	20261	1	-	-
50 x 60 - 2"	20262	1	-	-

Code	A (mm)	Float Ø (mm)
20259	386	180
20260	591	220
20261	596	220
20262	699	300

DOMOTICPOOL

Domoticpool

With the centralized Domoticpool electronic panel, monitoring and controlling the poolside equipment (lighting, filtration, garden watering, pool cleaning, etc.) is achieved installed inside of the residence without laying out any wires. For obtaining this, a Control Unit located in the house communicates with the Communication Module situated in the Plant Room. This is achieved using the conventional electric network of the house as order transmitter.

It consist of:

- Two way communication using the power lines.
- Graphic display with finger touch screen.
- True time clock permitting programmed temporising cycles.
- Personalized communication protocol.
- Two way transmission.

Easy installation and cost reduction has to be highlighted as it eliminates cable laying, thus enabling its control from anywhere, where we have access to electric network. Electric terminals can be easily added both in existing pools as well as in new ones. Communication module has 3 relays with inlets/outlets and 2 temperature sensors inlets.

	Code	Standard Packaging	Standard Weight kg	Standard Volume m ³
Centralized electric control	27815	1	0.92	0.002
Communication module for control	27816	1	0.36	0.001
Temperature sensor	30888	1	-	-

Control Unit with Finger touch screen

Communication Module

THERMOMETERS

Thermometers Shark series

Both models feature a float at the top of the thermometers, allowing for accurate pool water temperature measurement. Readings are easy to get, without the need to remove the thermometer from the water.
 Digital model: shows temperatures in both °C and °F through a LCD display. Runs on solar power.
 Analogical model: measures water temperature in both °C and °F.

Analogical model
